Preparation Before Using

1. Checking grow light and accessories fullset.
2. Plant growth light is not allowed damaged.
3. Please read the product instruction carefully especially the using points.

Brief Introduction

Full spectrum LED grow light is the newest trend for helping indoor plant growing. Advanced LED chips, provide broad spectrum of 400nm-840nm, similar to sun-light, but mostly cover red and blue light, it is best for plant growth, and suitable for all stages of plant growth. This is a revolutionary step of LED Plant Grow Lights.

The main part of the whole spectrum light is blue(peak465nm) and red (peak630nm), which supplies the most efficient wavelength to enhance photosynthesis performance.

Technology Parameters storage

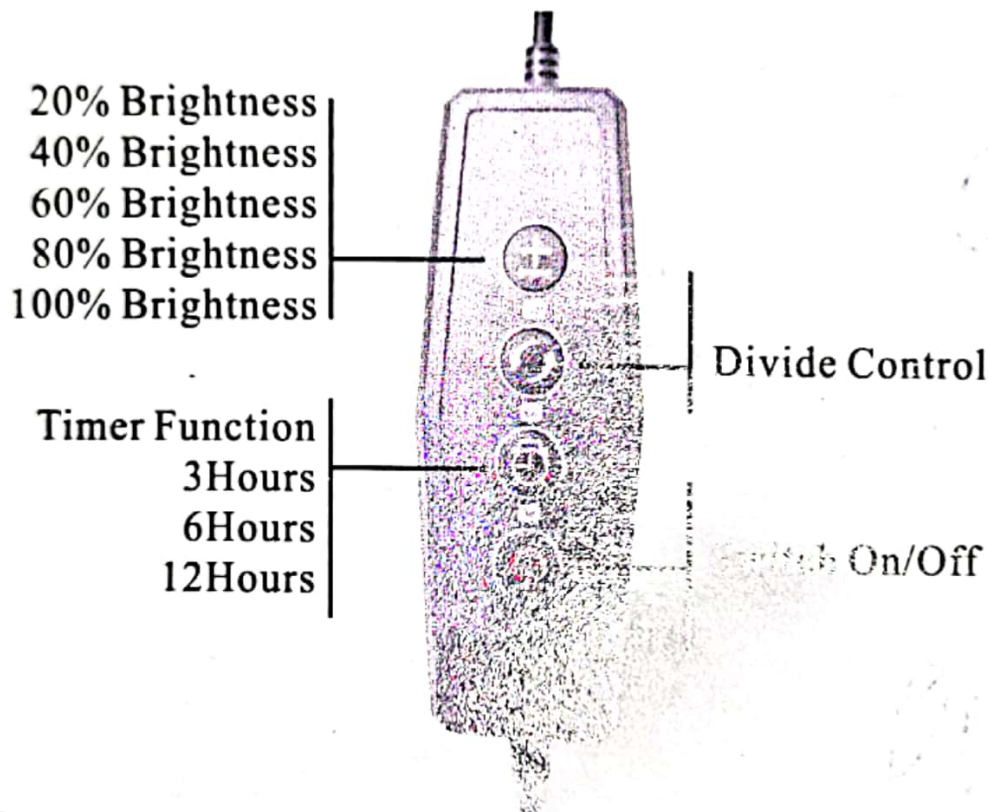

Descriptive	LED Grow Light
Model No	SMD 2835
Rated Voltage	100-240V AC
Rated Power	45W
Wavelengths	400-700nm
Working Temperature	0°C-40°C
Packing Size	125x125x90 MM
Product weight	835g

1. If storage time is longer than 6months, pls open the carton and turn on the light for a while.
2. Keep it away from rain, snow, fire and any other dangerous place.
3. Prevent it from strong sunlight and corrosive gas. Your room should be well ventilated while using it.
4. Do not look directly into the light when the lamp is in operation.

After-sales Service and Maintenance

1. No moisture, No strong sunlight, No pollution.
2. Please remember to cut the power off before cleaning the light.
3. Please keep it in safe place after using and don't put heavy things on it.
4. Please contact us for help when it doesn't work. Please don't maintain it by yourself.

Timer Function for 3H/6H/12H

Feature:

1. Easy for using: By short pressing key to turn on/off the light.
 2. Switch key: A side light on, B side light on, both side light on.
 3. 5 Dimmable Levels. You can adjust the brightness of light according to your needs.
 4. Automatic Time Setting For 3H/6H/12H:
 - (1) Choose 3H hours timer, the grow light will automatically turn off after 3H using and turn on again after 21H.
 - (2) Choose 6H hours timer, the grow light will automatically turn off after 6H using and turn on again after 18H.
 - (3) Choose 12H hours timer, the grow light will automatically turn off after 12H using and turn on again after 12H.
- Note: This operation requires a condition of uninterruptible power.
